Summary

A building or complex of bldgs. in an iron curtain country. Used for scientific research + experimentation, involving the military. 3 groups of people - directors, who were associated with ambition; experimenters who were curious, resolute single minded + dispassionate; and subjects, who were fearful, bewildered uncertain, fearful and full of despair + trepidation. Pain was associated with the experiments. Laboratory animals were present. Patients were captives. Research was secret, w political implications. Medical + laboratory equipment present included monitoring equipment (radioactive); blood spectrum analyzers; surgical tables; oscilloscopes; optical equipment; electronics + computers; filters; and autodes. Sterile environment were involved, as was some application of Sonics; research with genetics + microorganisms seemed to be involved also. Behavioral, conditioning, + psychological, + institutional aspects seemed to be present.

Airtel associated with site.
